DURO WIN
uPVC Windows & Doors System

When you choose new windows or doors for your home, you are making an important decision. Of course you want products that offer true style and quality at a reasonable and affordable price.

But more than that, you want to deal with a company that is professional, responsible, secure and understands the importance of customer service.

And that's why, year after year, more and more people choose to work with Duro Win and why we have grown to become one of leading manufacturers and installers of PVC-U windows and doors.

SLIDING WINDOWS FEATURES & OPTIONS

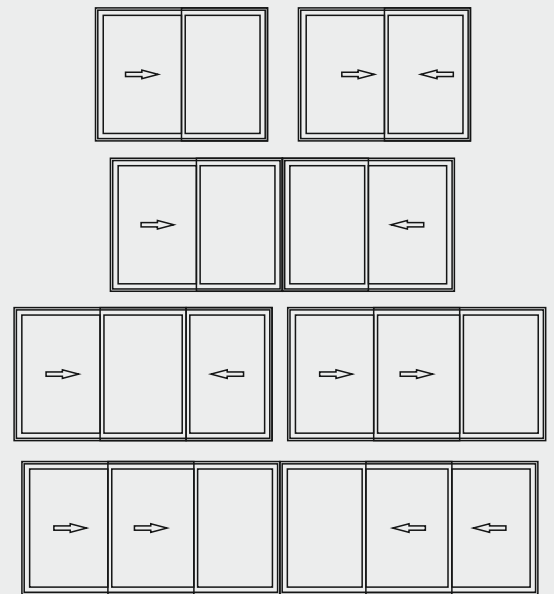

Sliding windows are designed to put the outdoors at your fingertips. There's no lifting, no cranking, no easier way to let the outside in.

With its solid lines the window can match traditional timber and colonial style designs.

With fusion-welded corners for weather-tightness as opposed to "screw together" aluminum joinery.

Multiple chamber system design enhances heat and sound insulation properties.

Design Configuration Options

Sliding Windows

Awning & Casement Window

Design Configuration Options

FEATURES & OPTIONS

Awning windows are the most popular window choice with outward opening sashes hinged at the top.

Casement Windows have outward or inward opening sashes hinged at the side

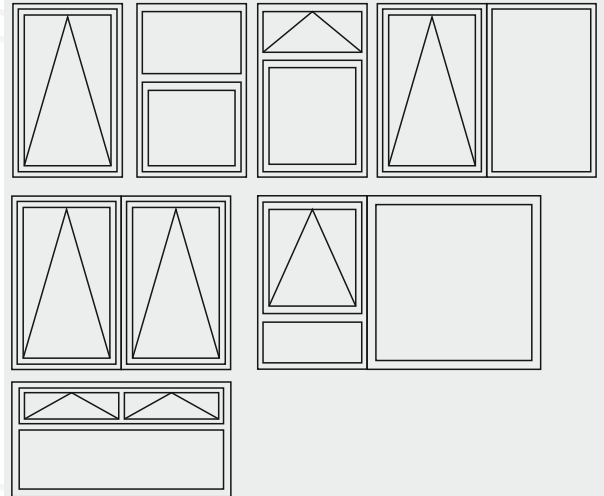

Sashes are latched with a single, centrally positioned Locking handle that operates Multipoint locking mechanism.

Safety stays can be added for additional security.

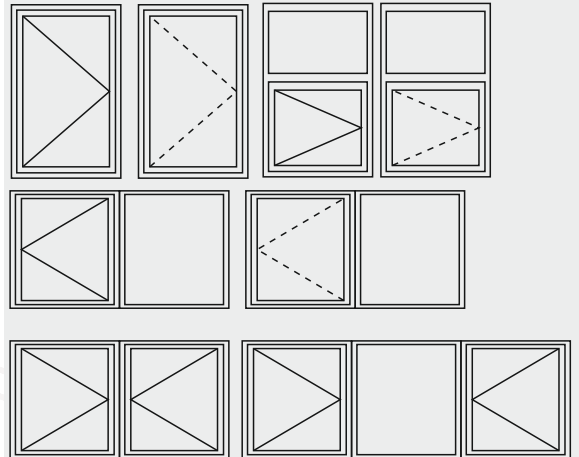

With fusion-welded corners for weather-tightness as opposed to "screw together" aluminum joinery.

Multiple chamber system design enhances heat and sound insulation properties.

Awning Windows

Casement Windows
